1 Login

1. Open **localhost:3001/login** in your browser.
2. Type **Email** 1 and **Password** 2.
3. Click **Sign in** 3.

Example: Sri Lakshmi Developers

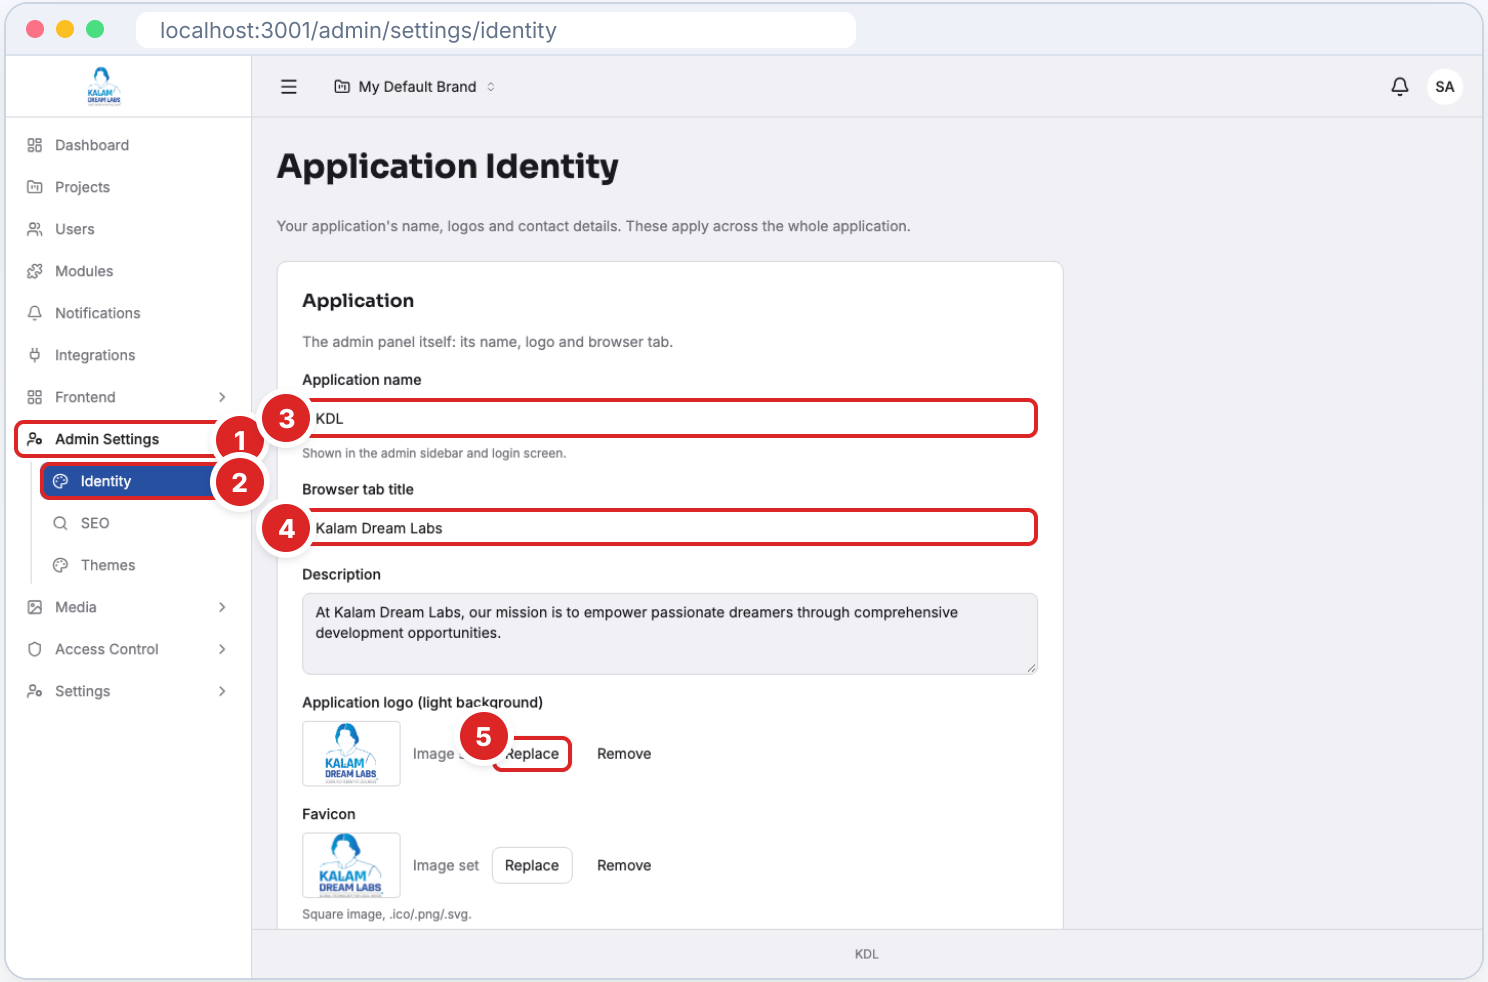

Next: Admin Settings → Identity

2 Admin Settings → Identity

1. Left menu: click **Admin Settings** 1, then **Identity** 2.
2. Fill **Application name** 3 and **Browser tab title** 4.
3. Logo: click **Replace** 5 and pick the file.

💡 **Fill all fields** (scroll down): company name and logo, colours, email, phone, address. Click **Save identity** at the bottom.

✅ **Change details later in this one place only.** Every landing page header and footer updates.

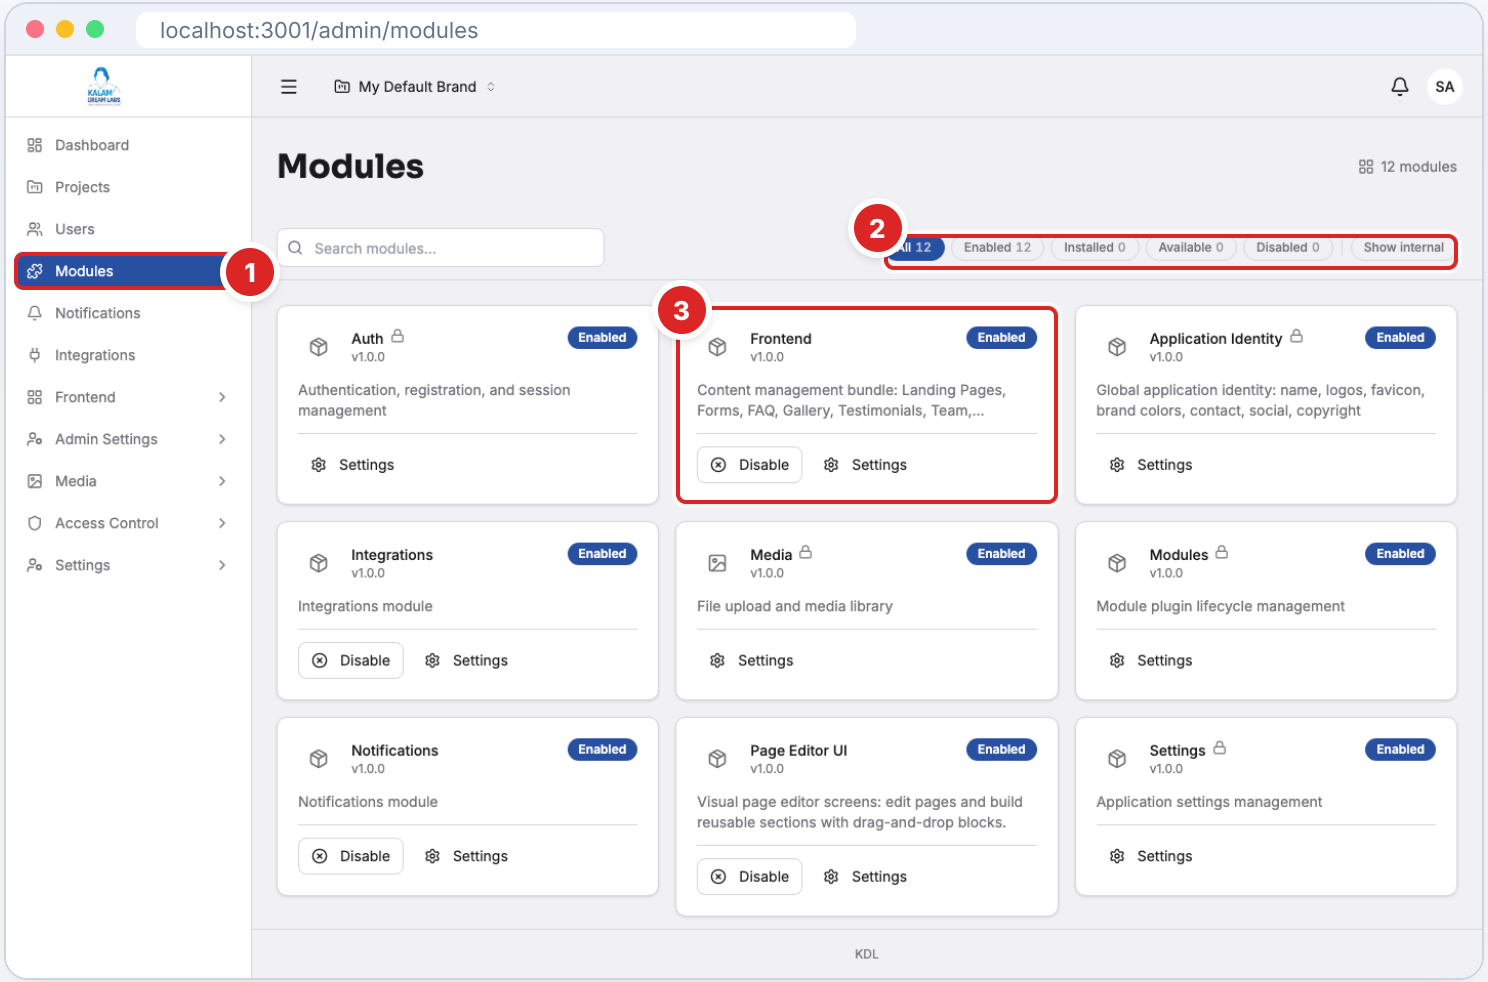

Example: Sri Lakshmi Developers

Next: Modules →

3 Modules: is Frontend ready?

1. Left menu: click **Modules** 1.
2. Use the filters 2: All, Enabled, Installed, Available.
3. Find the **Frontend** card 3.

✅ **Enabled** = ready. If it says **Available**: click **Install**, then **Enable**. Menus appear at once.

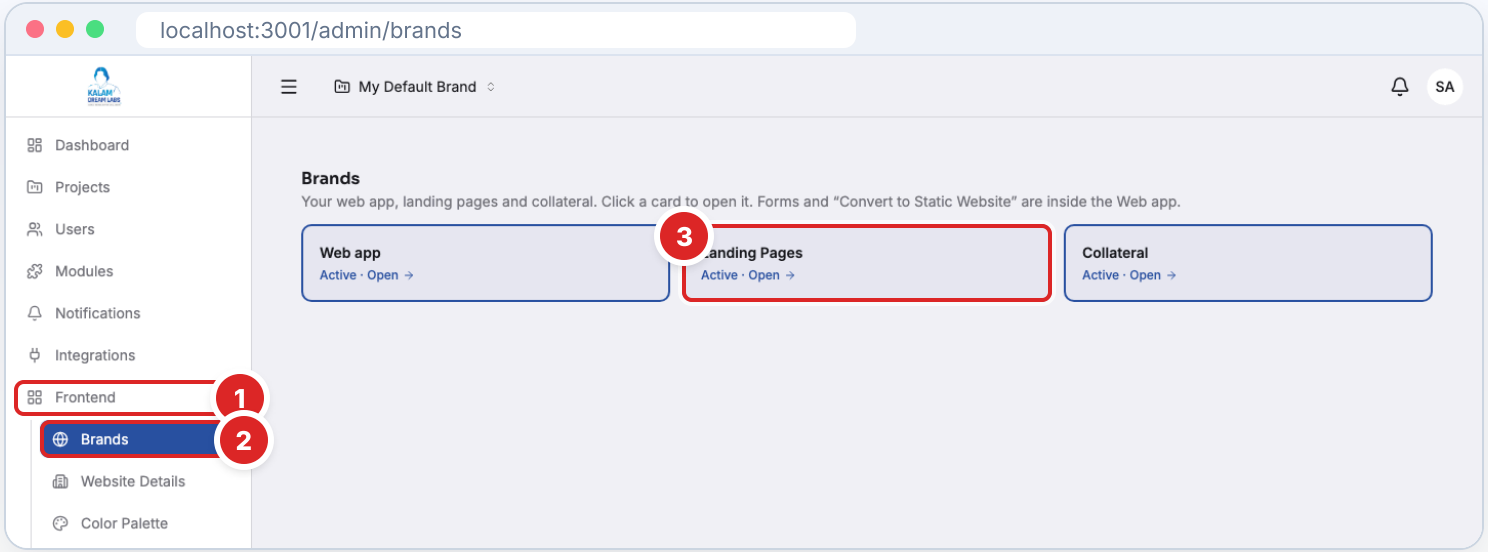

Example: Sri Lakshmi Developers

Next: Frontend → Brands

4 Frontend → Brands

1. Left menu: click **Frontend** 1, then **Brands** 2.
2. Click the **Landing Pages** card 3.

💡 Keep the **Page Editor UI** and **Media** modules Enabled. They are, here.

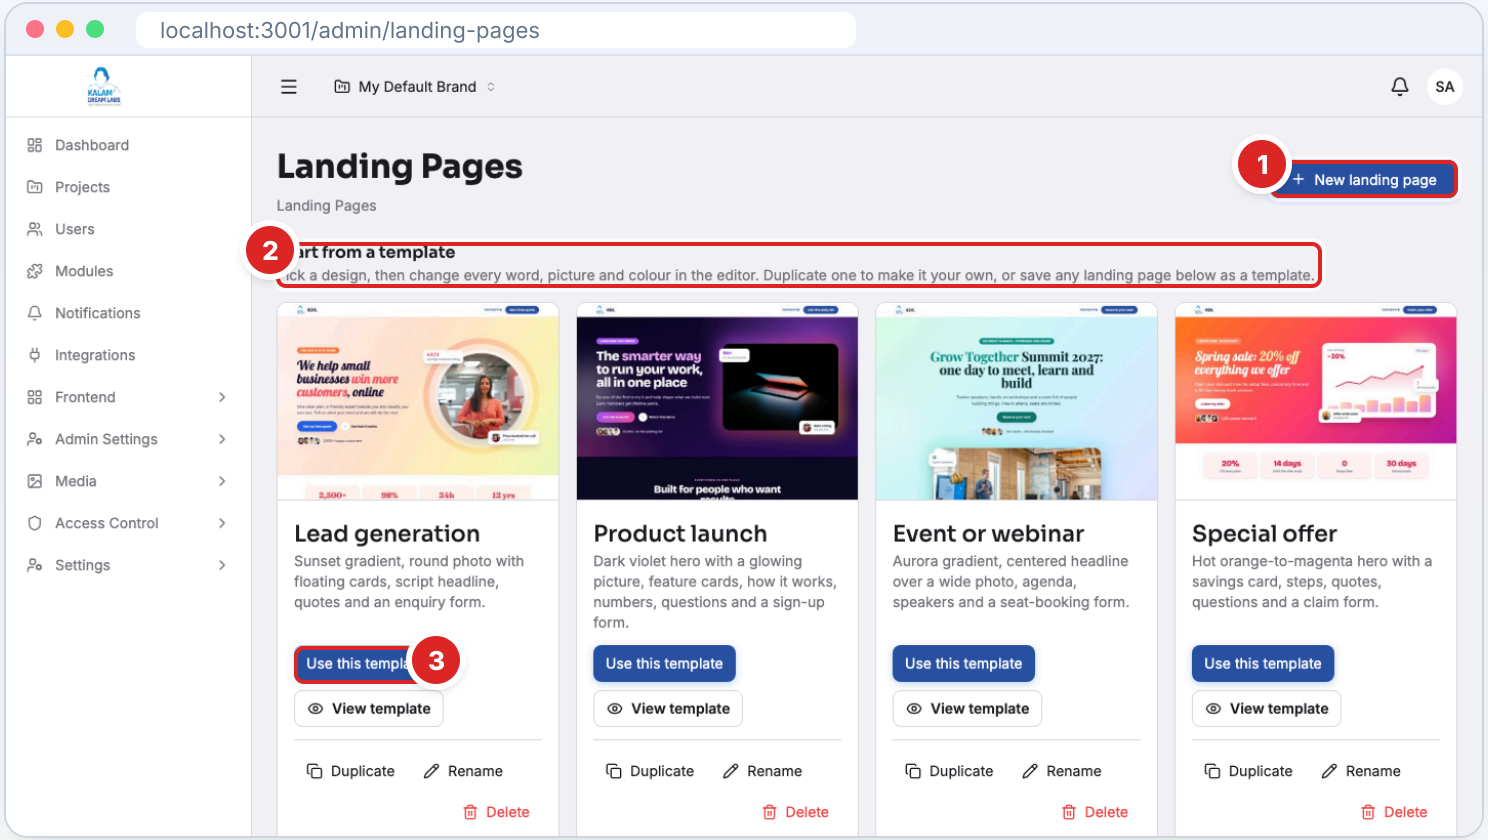

5 Landing Pages: pick a template

1. **Start from a template** 2: pick any one of the four.

2. Click **Use this template** 3 on the card you like.

✅ Every template has a **header** and a **footer**. Logo, name, phone, email, address and colours come from **Identity**.

⚠️ Do not click **Delete** on a template card. It removes the template for everyone.

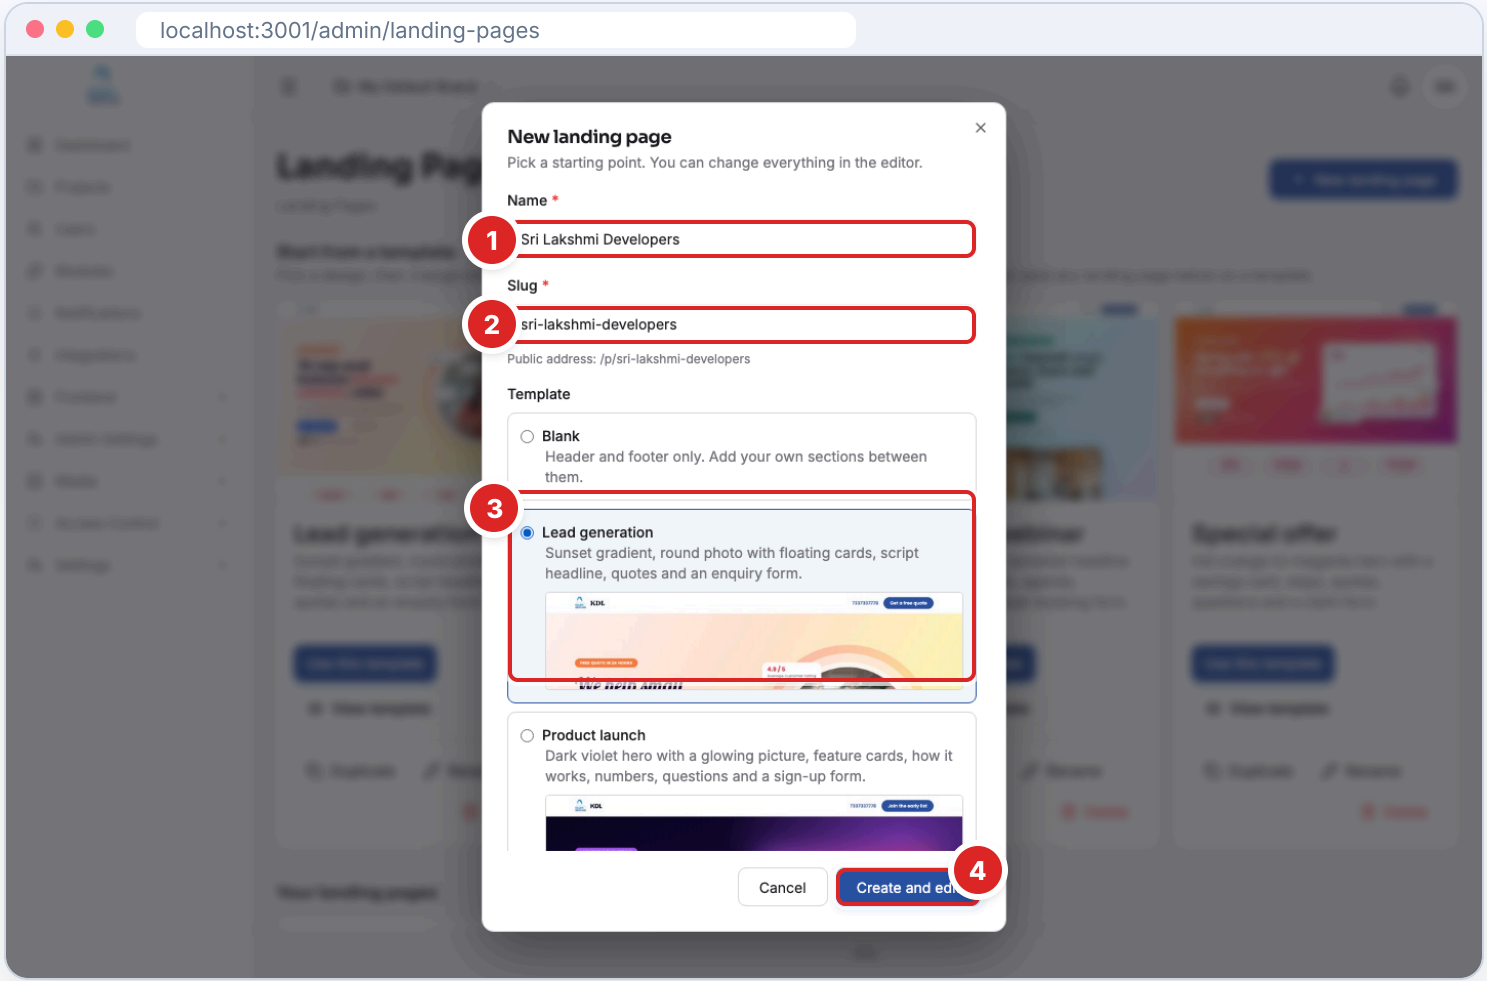

Example: Sri Lakshmi Developers

Next: New landing page →

6 New landing page

1. **Name** 1: Sri Lakshmi Developers
2. **Slug** 2: sri-lakshmi-developers
3. **Template** 3: the one you picked.
4. Click **Create and edit** 4.

> 💡 The slug is the page address. Use a different slug for every client. The page starts as a **Draft**.

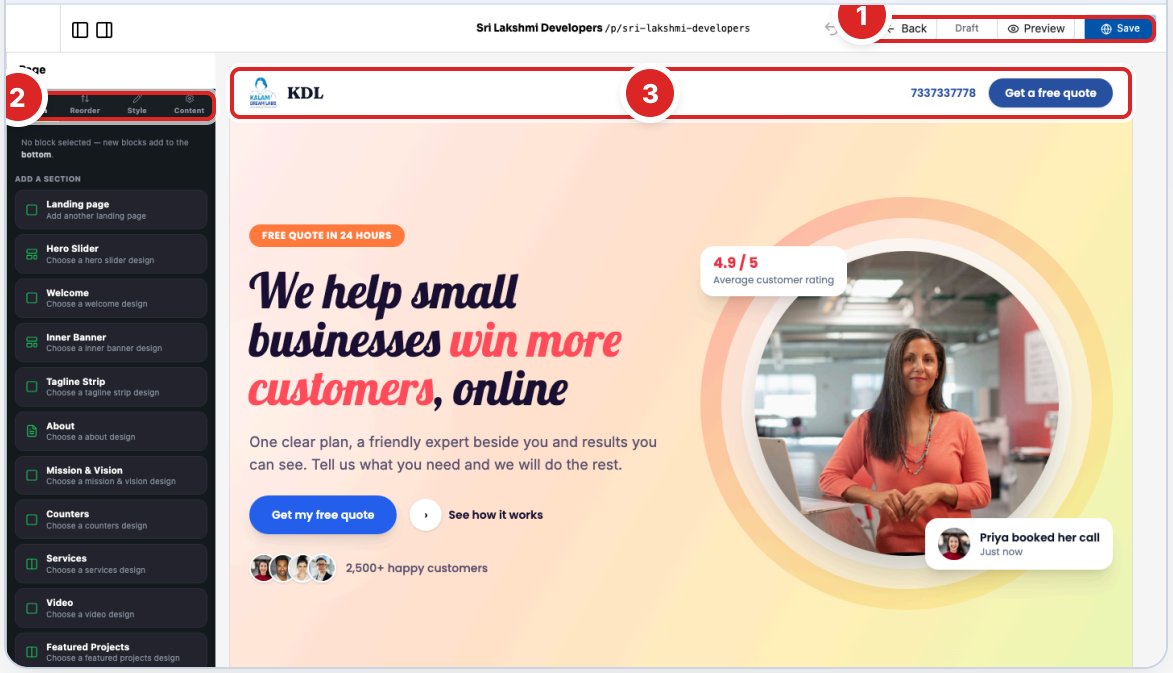

Example: Sri Lakshmi Developers

Next: Editor →

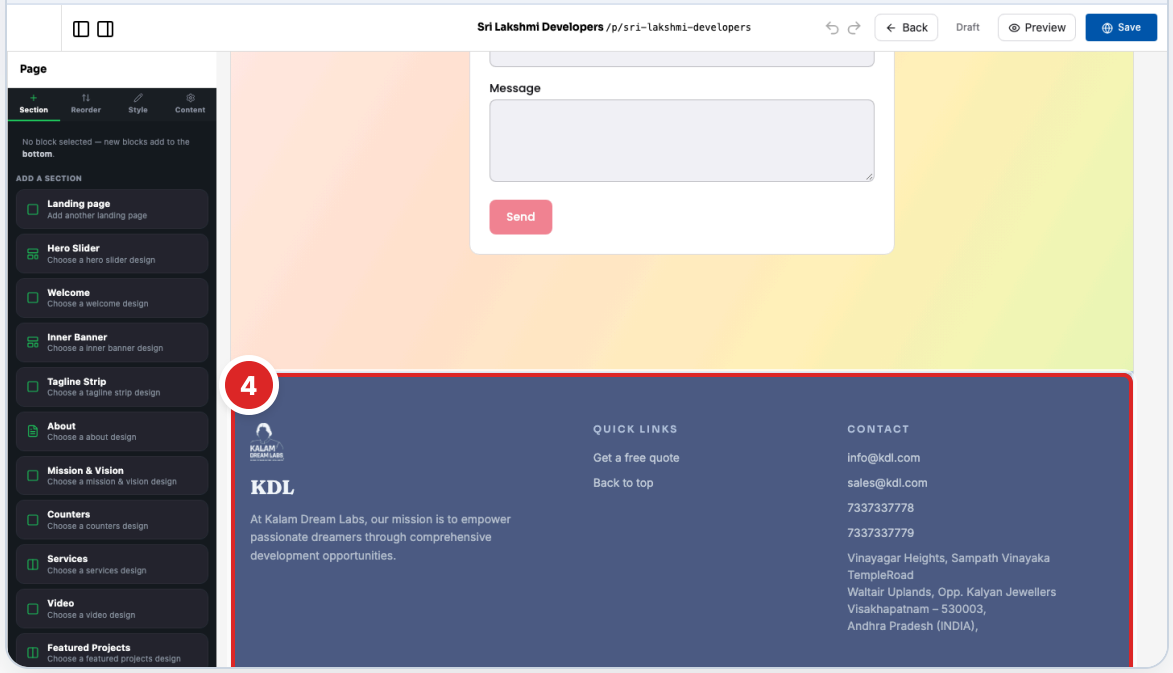

7 Editor

1. Top bar 1: **Back, status, Preview, Save.**
2. Left tabs 2: **Section, Reorder, Style, Content.**
3. Your page: **header** 3 on top, **footer** 4 at the bottom.

Editor: top of the page

Editor: bottom of the page

💡 Left sidebar: **Section** adds blocks, **Reorder** moves or removes them, **Style** sets design and colours, **Content** edits text and photos.

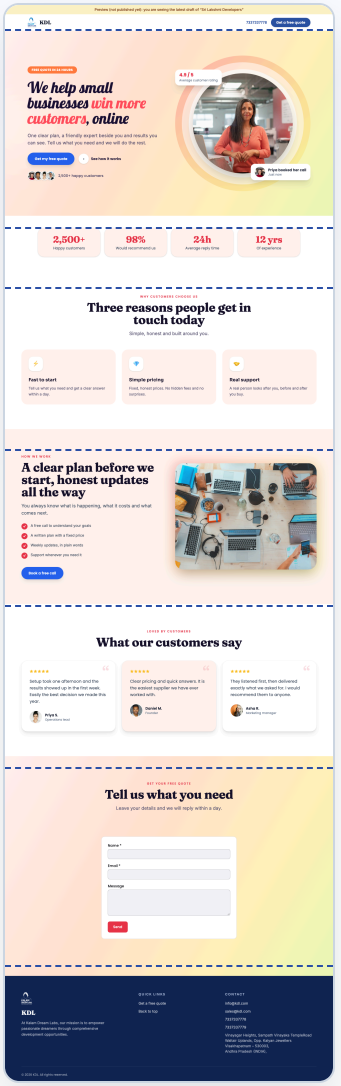

✅ Your draft saves by itself. Visitors see nothing until you click **Save**.

Example: Sri Lakshmi Developers

Next: Preview →

8 Preview

Click **Preview**: your **full landing page**, from the header to the footer.

Header
logo, name, phone, button

Hero

name, email, message

Footer
logo, email, phone, address

✅ Your logo, name, phone, email and address in the **header** and **footer** come from **Identity**.

Example: Sri Lakshmi Developers

Next: Save

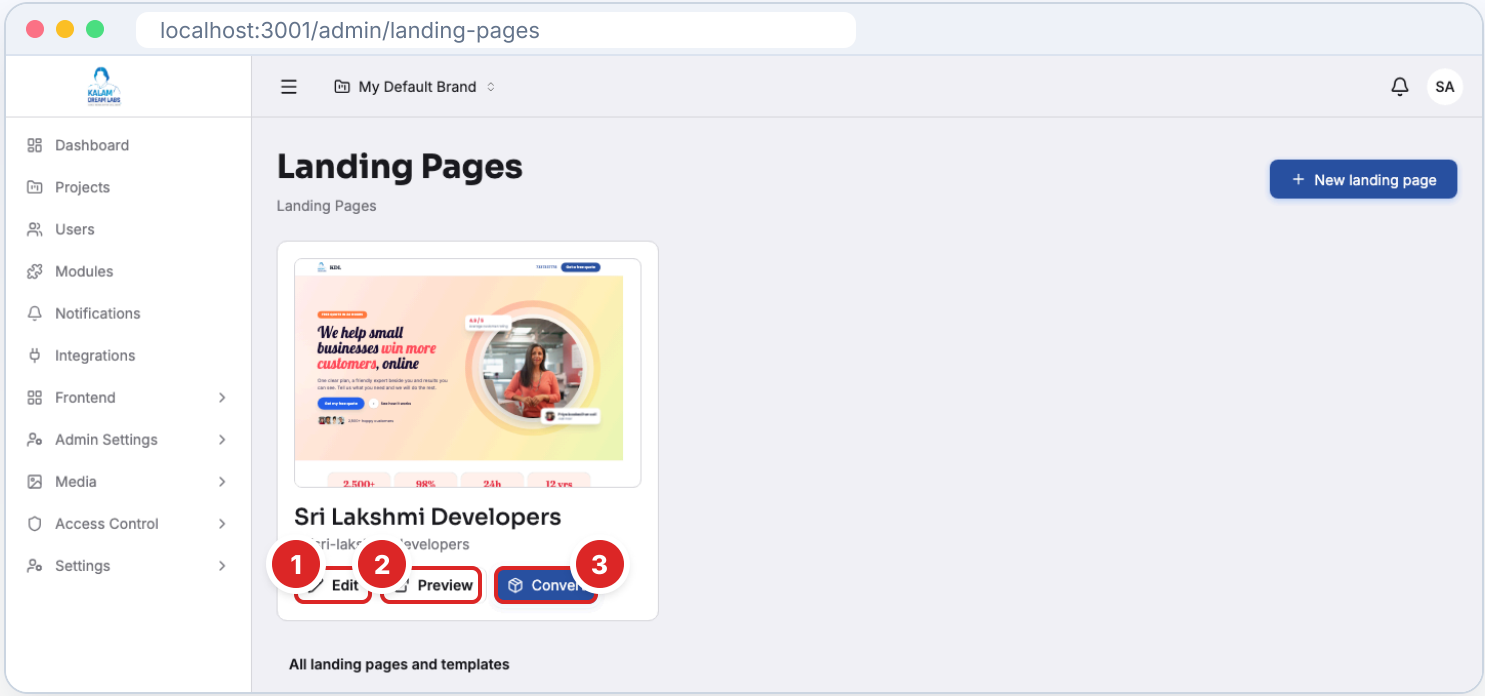

9 Save after approval

1. Open the page and click **Save** (top right). You come to the **Landing Pages** screen with only your finished pages.

2. **Edit** 1 goes back to the section editor. **Preview** 2 opens the live page.

3. **Convert** 3 puts the page files in its own folder.

⚠ Every landing page has its own card and its own folder.
